The GRR-Ripper

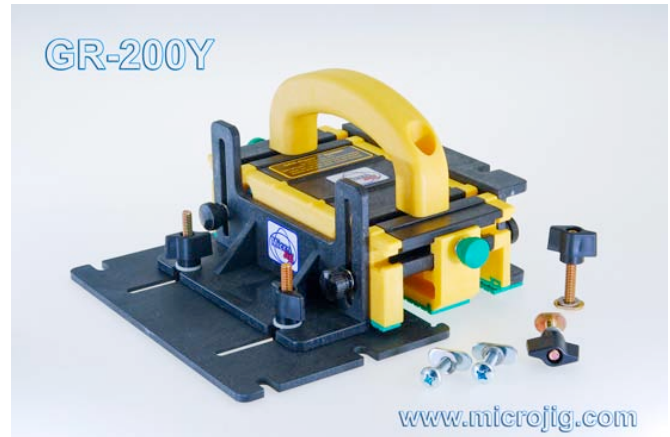

Ultimate 3D Pushblock System

Save your fingers and virtually eliminate kickback | Surgically precise and safe cutting

Basic GRR-Ripper (GR-100)

MSRP: \$49.95

Advanced GRR-Ripper (GR-200)

MSRP: \$69.95

Product Info:

Feed and control wood on a table saw safer than you could with your hands alone and more precise than with conventional pushing devices. Its a moving blade guard for your hands and virtually eliminates kickback. Use for cutting small pieces and replace pushsticks, featherboards, and pushblocks.

The two most violent injuries (kickback & losing fingers) in woodworking are finally solved with this one tool. Use it on the table saw, router table, shaper, jointer, and band saw for simply safer cuts.

Use two GRR-Rippers for longer stock!

MJ Splitter System

Simple, Exact, Effective Table Saw Splitter

Virtually eliminate burning and kickback | Cut with confidence | Plug and Play | Perfectly aligned

1/8" Kerf Model (SP-0125)
MSRP: \$19.95

Thin Kerf Model (SP-0100TK)
MSRP: \$24.95

*Voted **BEST TOOL** by Popular Woodworking Magazine!*

Product Info:

Our award-winning MJ Splitters™ are simple, but effective. The set-up could not be easier. We provide a user-friendly installation drill template—we even provide the drill bit. So simple to install it's foolproof. But, its our Plug N' Play concept that will make sure you keep using your splitter. Remove and remount your MJ Splitter™ to your zero-clearance insert (ZCI) in 2 seconds. Finally, a splitter that is easy to use, easy to install, and easy to align for the table saw. So, now you quickly remove your splitter and plug it back in when you need it—perfectly aligned, every time.

MJ Splitter SteelPro System

Our toughest and most advanced table saw splitter ever

Stainless Steel Core for rugged durability | Prevent kick back from binding and wandering wood

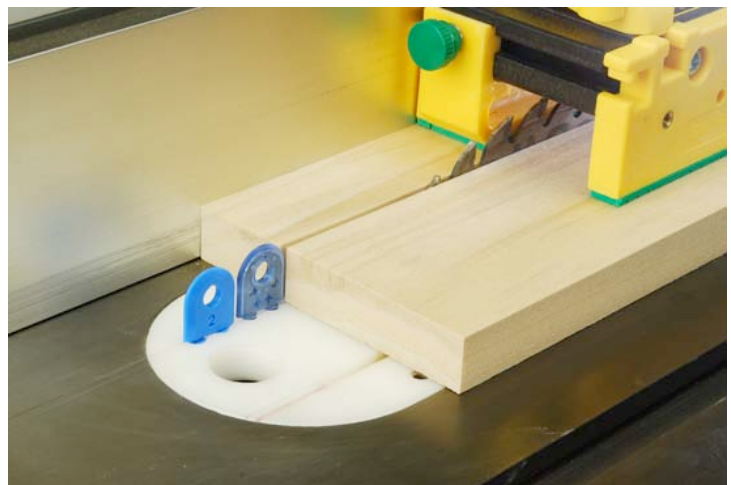

1/8" Kerf SteelPro Model (SP-2)
MSRP: \$34.95

Thin Kerf SteelPro Model (SP-2TK)
MSRP: \$34.95

Product Info:

Our New MJ Splitter™ SteelPro is constructed from a 100% polycarbonate shell and reinforced with a solid stainless steel core. Our toughest splitter ever, utilizes the same patented technology of our original MJ Splitters. The SteelPro employs another groundbreaking innovation for table saw safety and efficacy: The Dual Splitter. This allows the splitters to control the pressure on the keeper piece AND the off-cut piece by the thousands on an inch. This virtually eliminate any chance of kickback on the table saw and greatly reduces the chance of severing fingers. We include an easy to follow drill-guide template to install the SteelPro System into your Zero Clearance Insert (ZCI). Remount and remove the Splitters in two seconds.

No more excuses for no splitter on the table saw!
